Dana Wharf Whale Watching

has successfully completed their remote audit and is a
WCA Certified Responsible Whale Watching Operator from
15 November 2019 to 14 November 2020

Dylan Walker
Chief Executive Officer, WCA

Three minute explainer pitch for your customers!

Thanks to your support, Dana Wharf Whale Watching is one of a special group of the world's leading responsible whale and dolphin watching tour operators delivering wildlife friendly encounters and, outstanding customer experiences. To achieve this, we are certified by the World Cetacean Alliance (WCA) – the world's largest marine conservation partnership!

Sounds good, but what does this mean, I hear you ask? It means that the World Cetacean Alliance assesses us on our animal welfare, conservation, and sustainability standards every year.

We meet those standards in our own unique way, by, for example:

Dana wharf started Whale Watching from Dana Point in 1971 , Don Hansen our founder , loved the Gray Whale and worked hard to get the animal on the endangered species list , he and his boats have taken thousands of children and adults out to see the gray whales .

Dana Wharf started the longest running festival of Whale in the world this year marks our 49th anniversary -

Recognized as a leader in the community and endorsed by Wyland artist of the sea ! We are also home to the Gray Whale Preservation and education foundation.- Dedicated to sponsoring children from local schools on field trips.

And there's more! Together with all of our WCA partners, we are already contributing tens of thousands of dollars back to whale and dolphin conservation projects around the world .

We hope you've really enjoyed your experience today, and thanks for joining us and spending time in this special place. Please come back with us or sail with another WCA whale watching partner soon! Simply download the WCA responsible whale watching app or visit the WCA website for more info. It's the best way to have fun and help us save our oceans!

Thank you!
