

REFERENCE LETTER

Name: Jhon Purba
Position: Director sector 5 Gunung Leuser National Park
Institution: Taman Gunung Leuser National Park

I've known Nora since 2019, where we met while working in the field following a tiger attack on local livestock.

Since then, we've collaborated on various wildlife conservation initiatives through community outreach activities.

Over the past few years, I've seen how Nora Arriazu, founder of Ibu Bumi Orangutan, has helped communities around the national park, working in partnership with local organizations such as USU, the University of Medan, village chiefs, ranchers, farmers, and local groups.

Her work and dedication are admirable, and it's a pleasure to work with her in matters of sustainable economic development, education, ecotourism, and conservation.

The program she contacted you for is in partnership with the community, always with our support for their needs.

The collaboration between her NGO and the National Park department is a friendly one, with no contracts or agreements.

She has a MOU with USU, which conducts scientific studies through its students, always in collaboration with Nora on the ground.

I sincerely believe she deserves the opportunity to receive your support for her program due to her tremendous dedication on the ground, both individually and without any sponsorship to date. I firmly believe she is qualified for her work and for the project.

Sincerely

03/05/2025
