Script: Mintom Gorilla Heritage Area Committee Talk to Club of Environment and Health, Local Secondary School

Speaker 1
We have other constituents of the environment. In the forest, we have the animals, among which we want to privilege the gorillas. This project, we can see it everywhere. This project comes from an institution called the Wildlife Heritage Area, that is to say, the protection of the environment. And in the environment, we have the forest, we have, our kori is a rare species. And if the kori disappears now, our children will not see the kori anymore. And the kori has a role to play in the environment. And with the disappearance of this species, we will not be happy anymore. And with the protection of this species, it will make the commune de Mintom benefit. And when we talk about the commune de Mintom, we talk about you and me. We have to do everything for you so that we can protect the kori in our environment. And I propose you to join our project, and that you help us to raise your parents, and your brothers, and your friends, who have already started the hunt of the gorillas. I am a member of this project, but the promoter of the project, or the initiator, is called Mr. Charlie Ndongo, and the supervisor is Mr. Dylan Walker.

Speaker 1
I also encourage you, the people of the Club of Environment and Health, the people of the Club des Amis de la Nature, and all the clubs that concern the environment, to come and sign up, to is a result of your competence. On this, I wish you a good start of the week, dear colleagues and dear students.
